Agriculture

The Ohio Sensitive Crop Registry (OSCR)

Division of Plant Health
Pesticide & Fertilizer Regulation Section

Total: 919

Motivation

- Damage from pesticide drift is a persistent problem
 - Most states have laws prohibiting drift (OAC 901:5-11-02-B-6)
 - Increasing use of 2,4-D and dicamba products
- Some pesticides carry sensitive area restrictions on the label (i.e., Enlist Duo)
- Applicators are required to notify nearby apiarists before spraying, under certain circumstances (OAC 901:5-11-02)

- OSCR is intended to be used by agricultural entities
 - Pesticide applicators
 - Commercial producers of specialty crops (e.g., tomatoes, vineyards, orchards, organic)
 - Registered apiarists
- **Not eligible:**
 - Residential and other non-agricultural properties
 - Private gardens
 - Sensitive community areas (e.g., nursing homes, playgrounds, etc.)
